

# Own the Standard for Structural Data Alignment

Deploy Growt's structural alignment engine under your own brand.

## The Proposition

Become the exclusive gatekeeper for AI model transfer, sensor validation, and data equivalence in your specific region and domain.

## The Bottom Line

Application areas are strictly exclusive. Once a region and domain are claimed, they are locked.

# The Machine Learning Blind Spot

## The Illusion of Safety

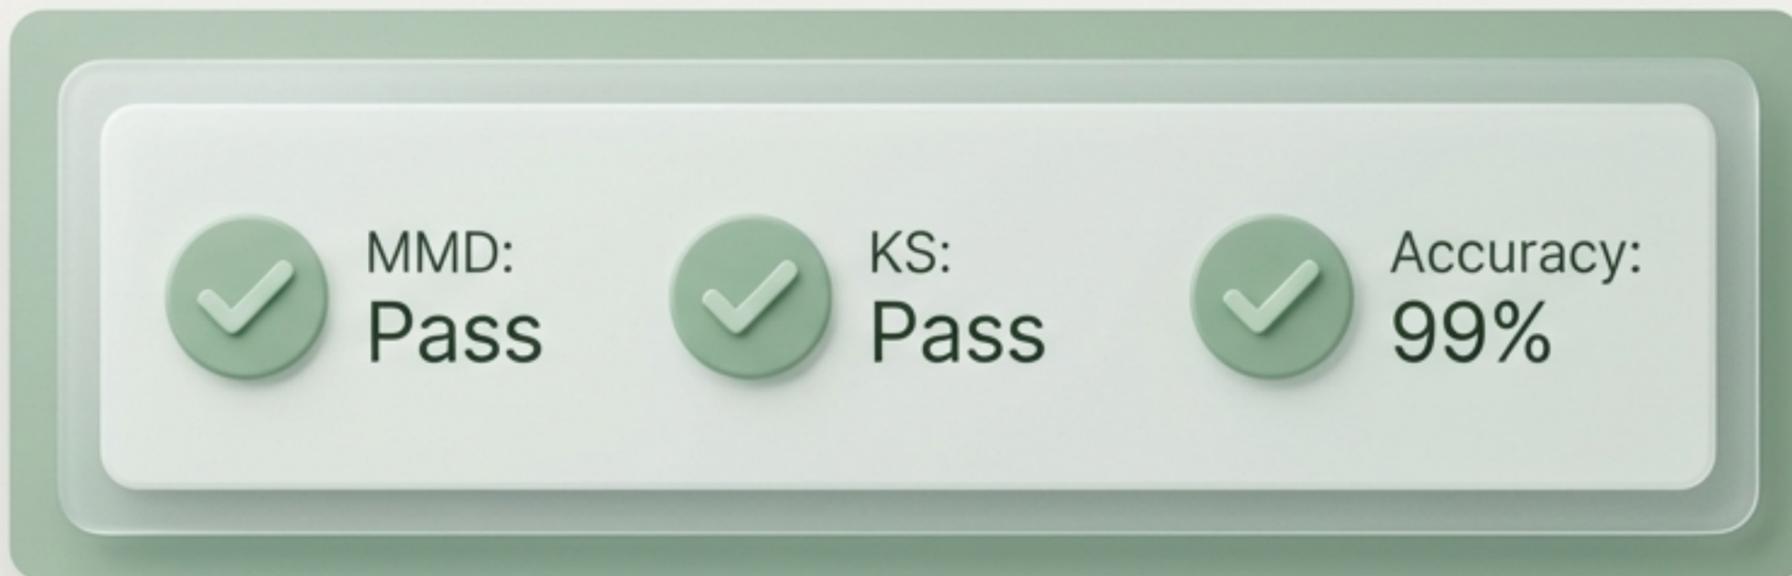

Standard metrics give a binary signal with a magnitude. They answer: **Are they different?**

## The Gap

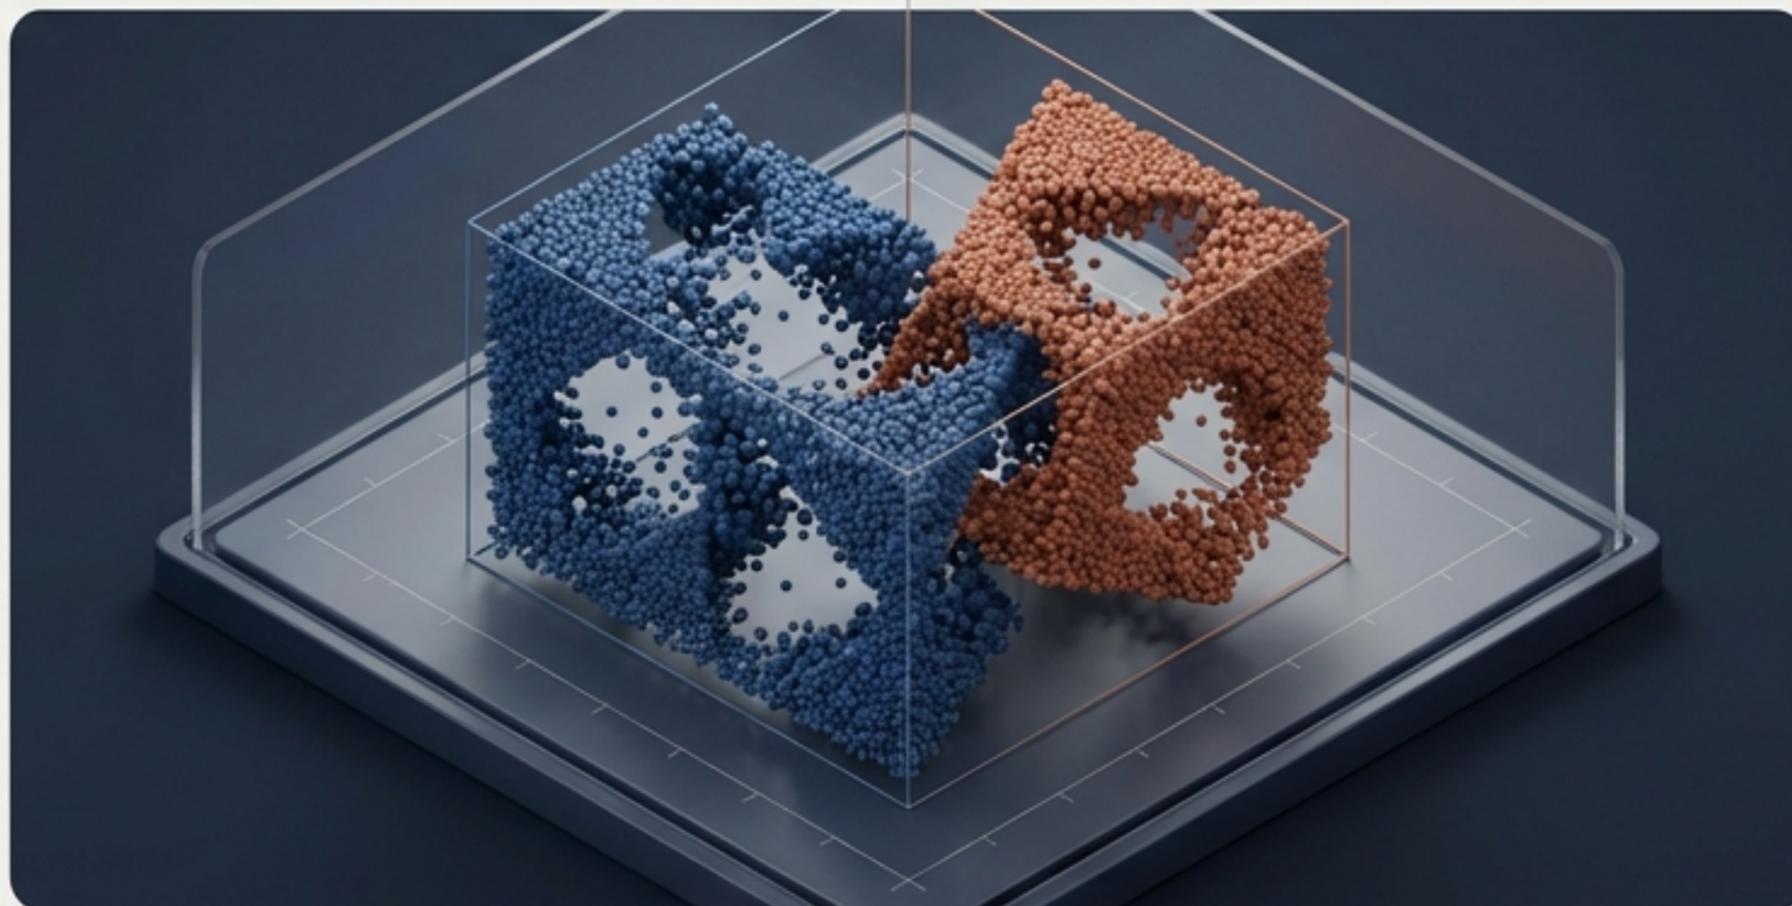

MMD gives a distance. KS gives a p-value. Classifiers give an accuracy score. None indicate **where or why the data diverges**.

## The Result

Models with identical means and covariances pass validation—and then silently fail in production due to hidden structural mismatch.

Standard Validation: No Detected Anomalies

Hidden Structural Mismatch: Silent Production Failure (Identical Mean/Covariance, Fragmented Data)

# Shift to Pre-Deployment Certainty

## The Growt Answer

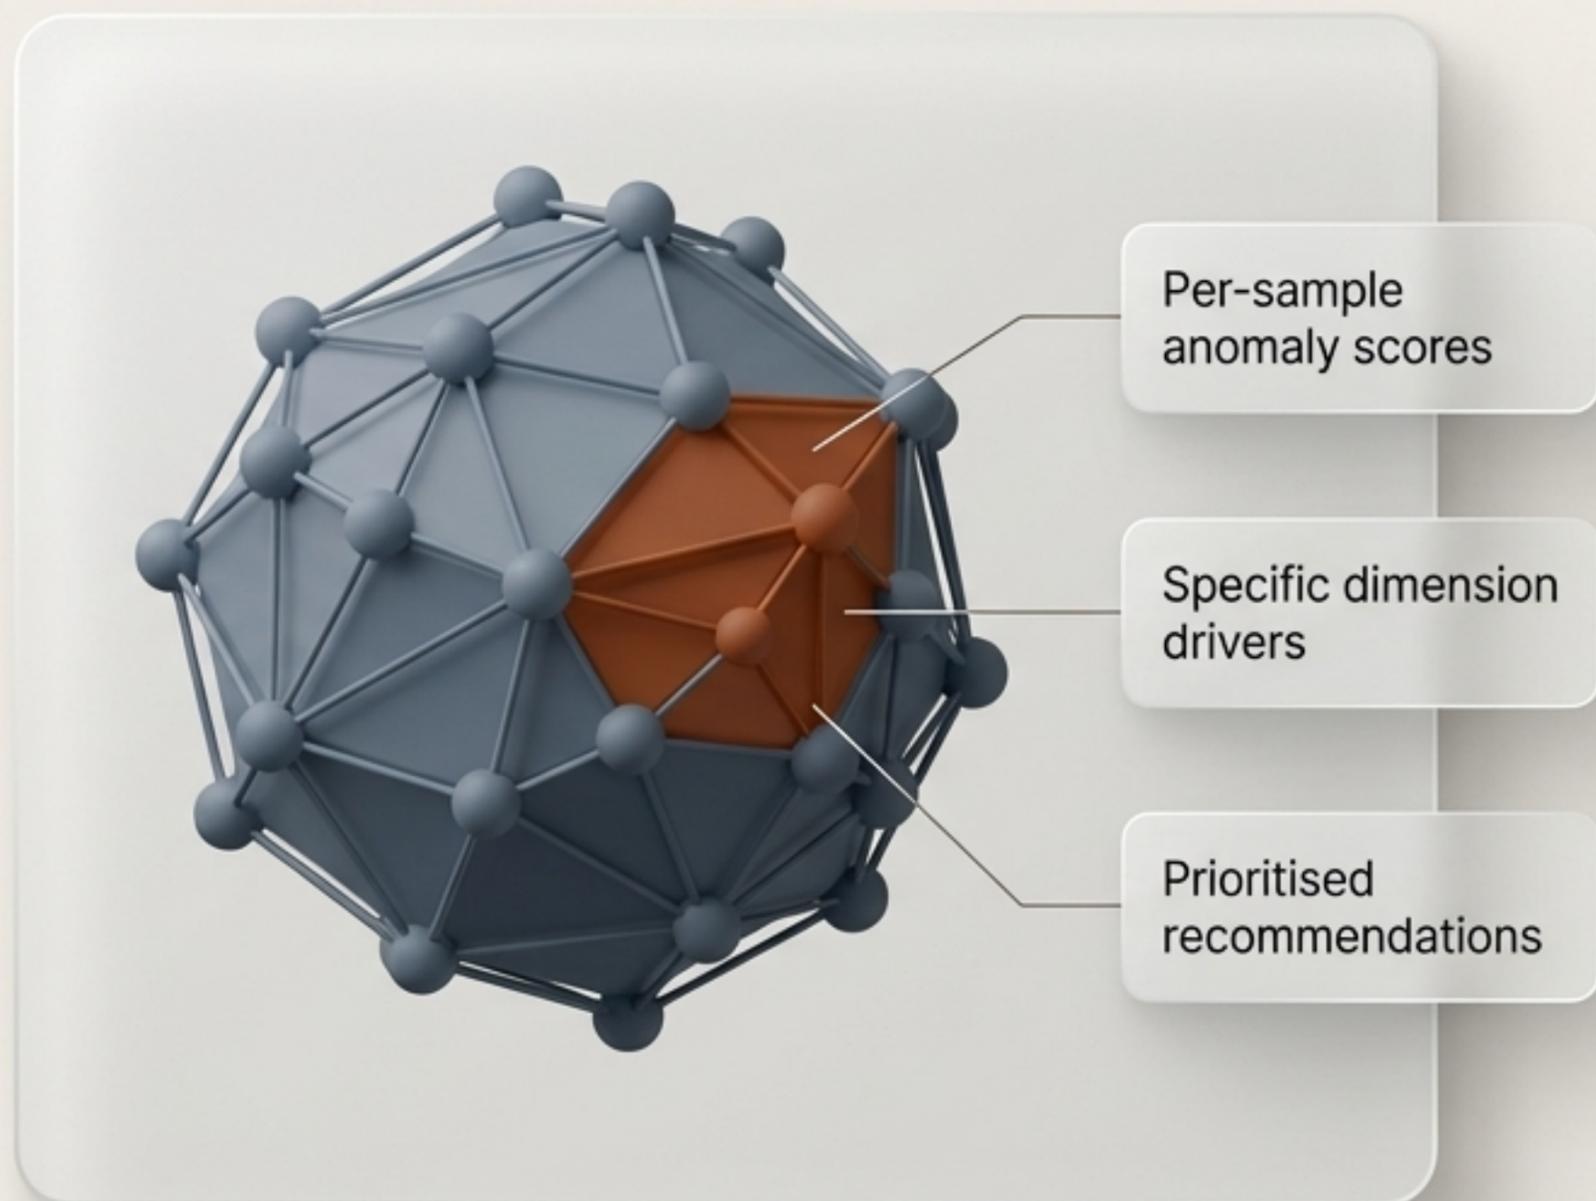

How are they different, and where?

### Proactive vs. Reactive

Catch regime changes and reality gaps before they break production, not post-incident.

### What Growt Reveals

- Identifies regions the reference space never reaches.
- Pinpoints specific dimensions driving divergence.
- Highlights genuinely novel inputs.

# The White-Labeled Gatekeeper Franchise

- **Your Brand, Your Domain**

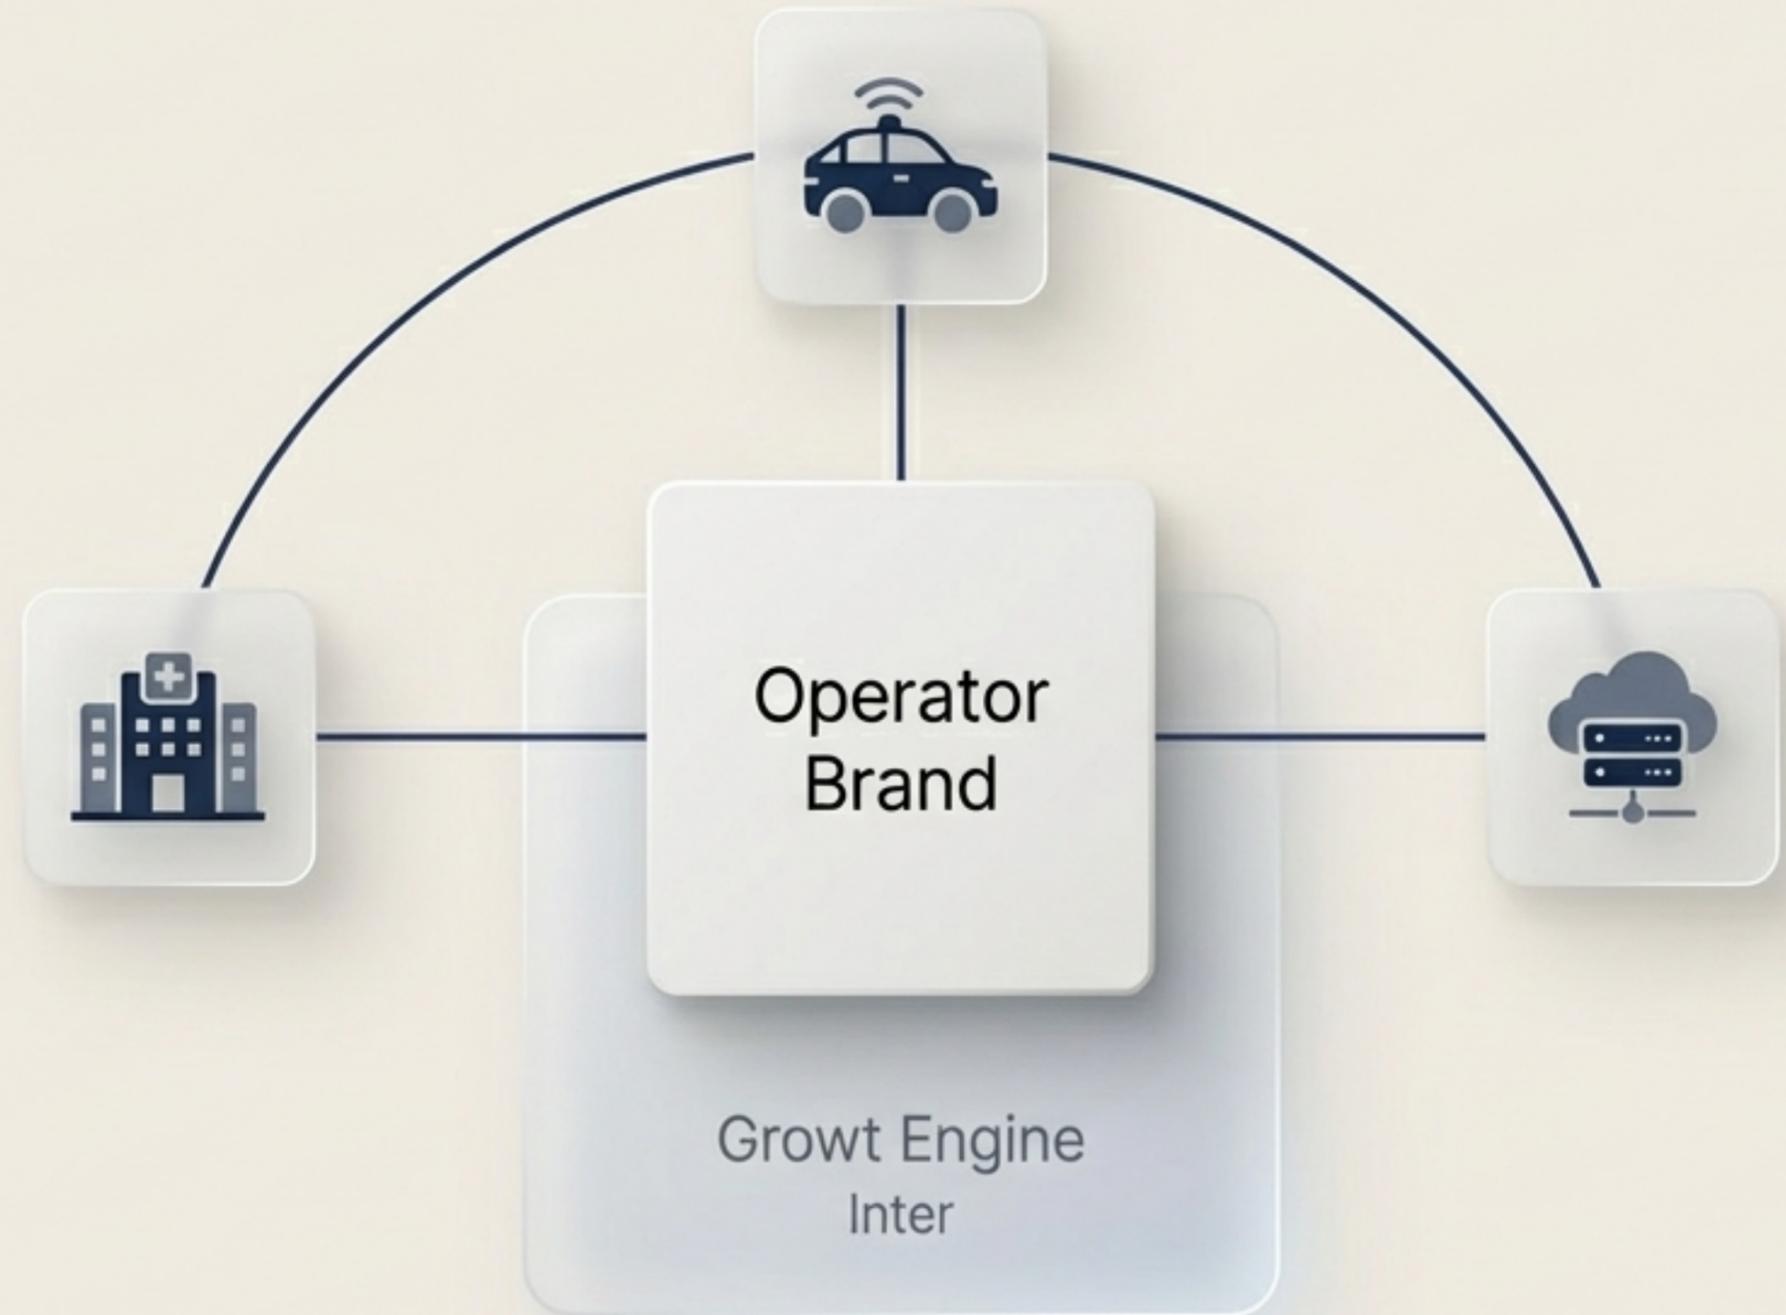

Custom logo, colors, and web domain.  
Your customers never see Growt.

- **Branded MCP Tools**

Custom tools using your specific vertical's  
language, with zero IP exposure.

- **Customer Management**

Full control to onboard, manage usage,  
bill, and issue API keys.

## A Universal Problem Across Every Industry

**Are these two  
windows onto the  
same thing actually  
the same thing?**

### **The Opportunity**

Any domain where two data sources must perfectly agree is an immediate monetization target for an Operator.

# Target Market: Digital AI and Foundation Models

## AI Model Transfer

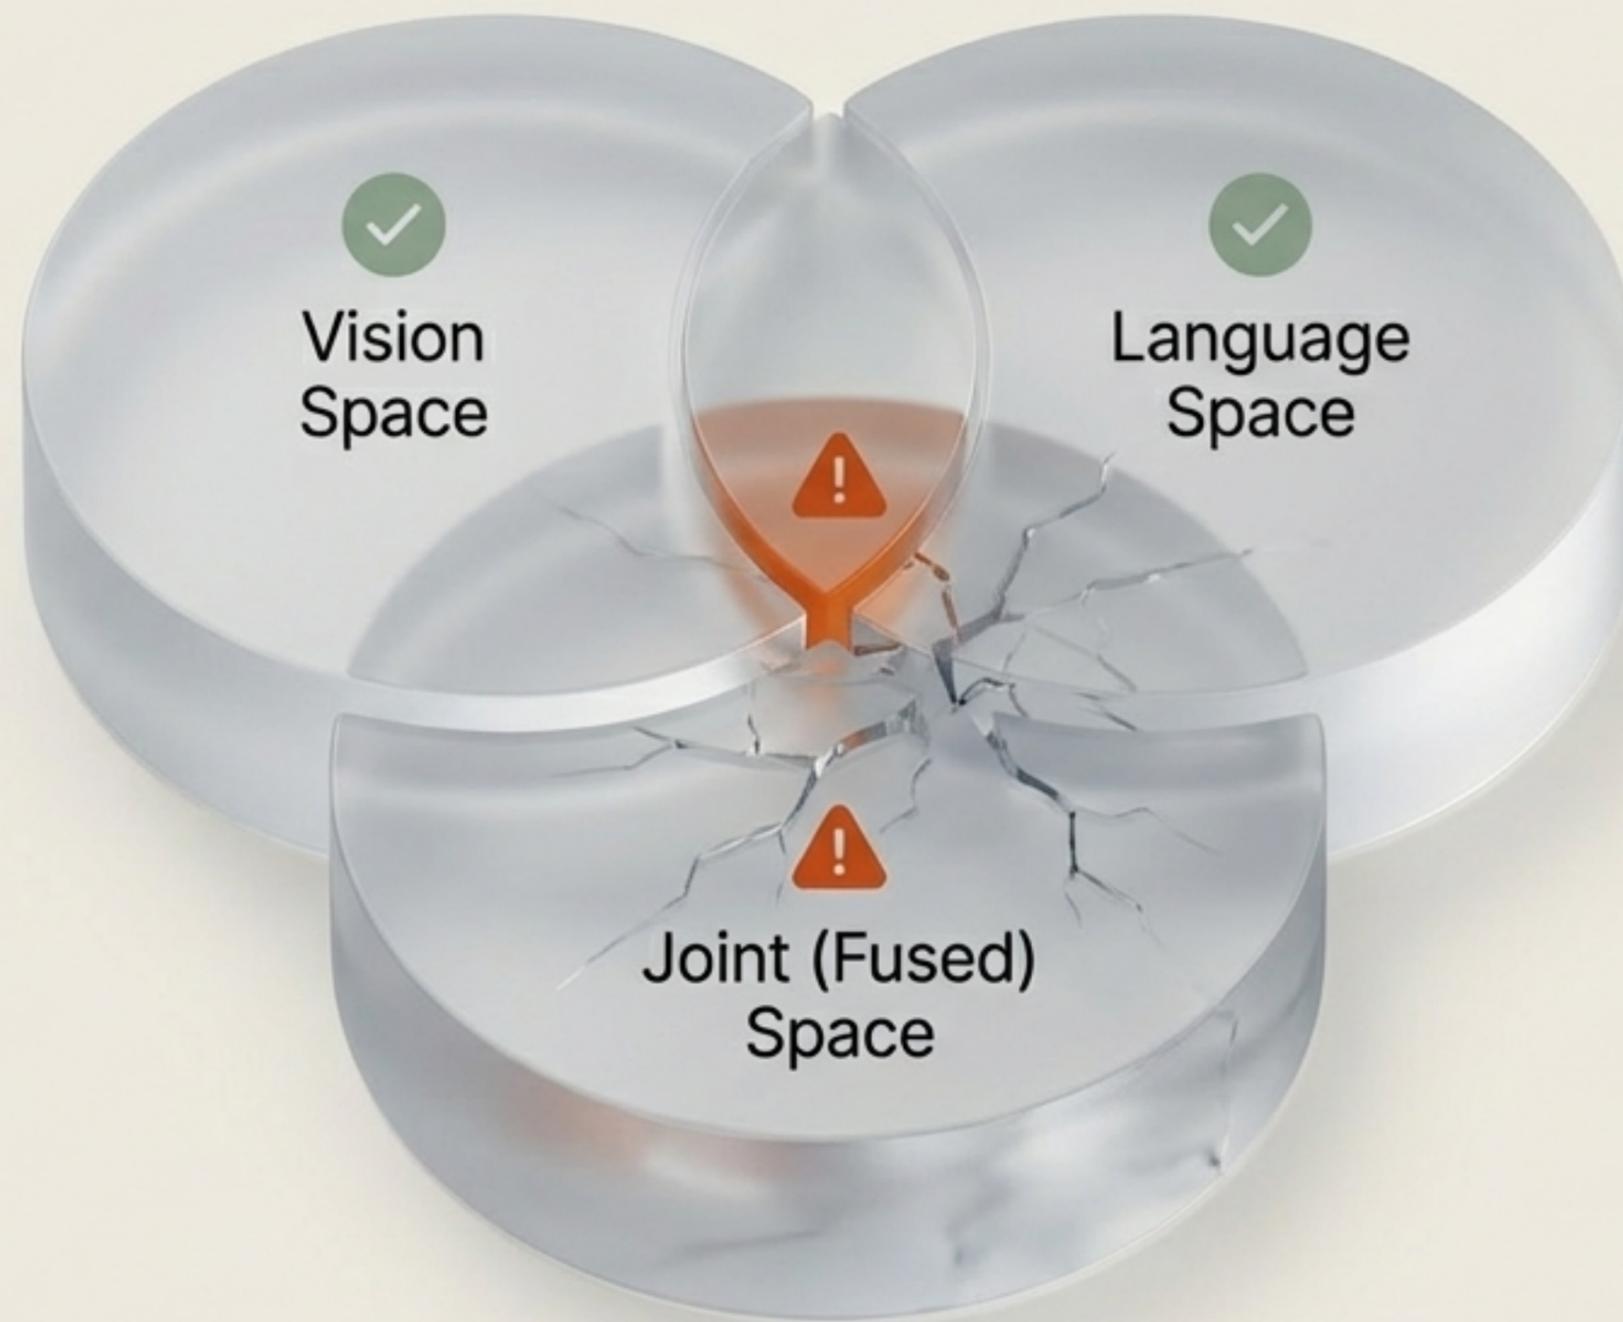

Validating if trained models transfer to production data before shipping.

## LoRA Adapter Testing

Proving a fine-tuned adapter structurally transfers to new base models.

## VLM & VLA Hidden Risks

Growt audits the Vision space, Text space, and the Joint fused space in a single call. One failing component blocks deployment.

# Target Market: Physical Systems and Sensors

## Sensor Pair Comparison

Do two radars or cameras structurally agree, or has one drifted?

## Sim-to-Real Transfer

Validating the reality gap before deploying a robot trained in simulation.

## Equipment Calibration

Ensuring test benches produce structurally equivalent results.

## Sim-to-Sim Comparison

Validating equivalence when migrating between physics engines.

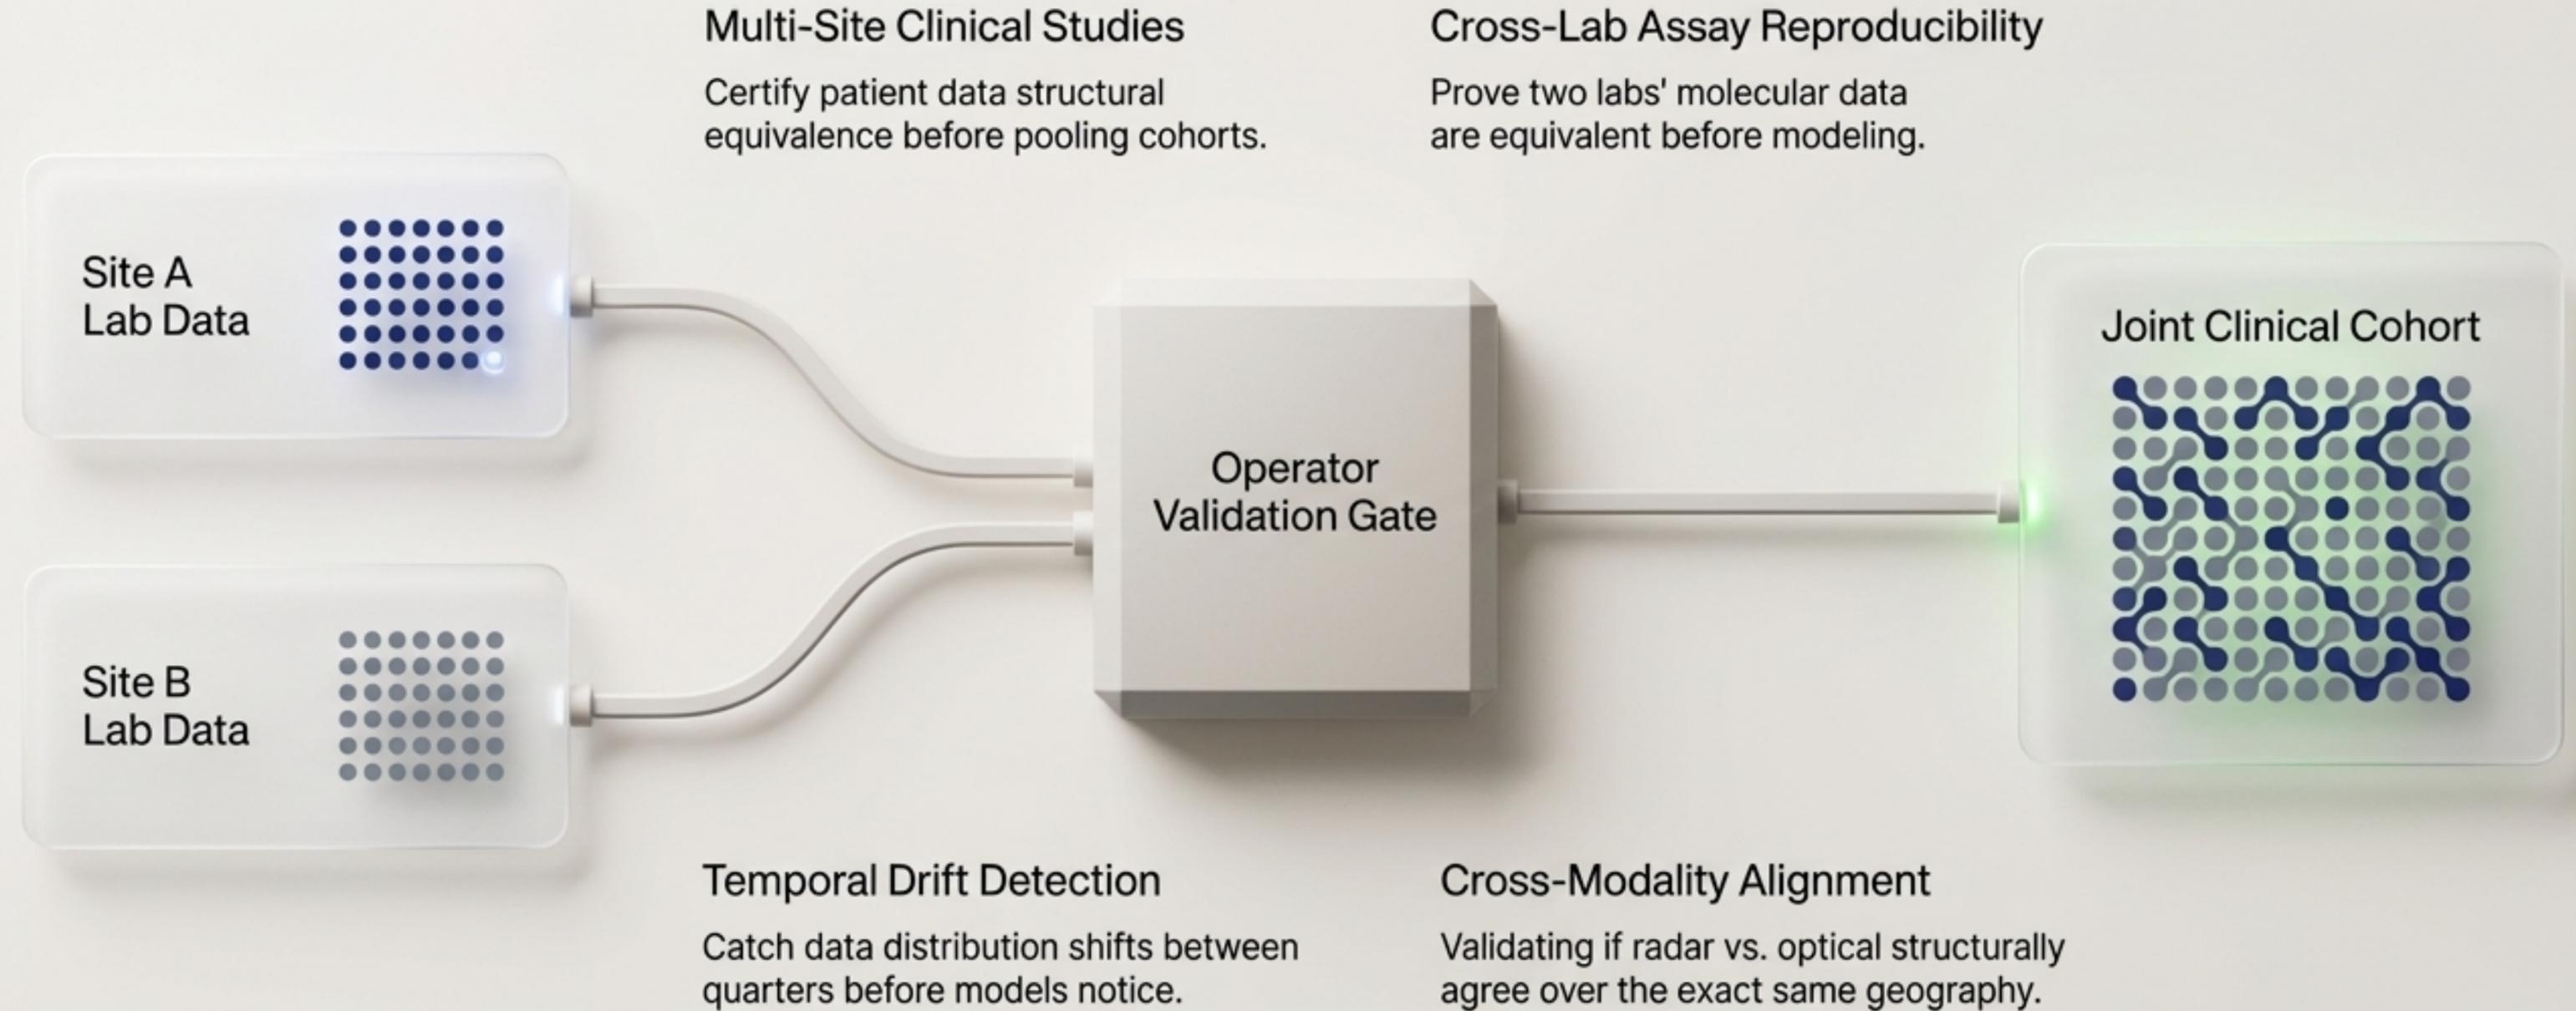

## Predict Missing Inputs

Run instruments together during calibration; if one drops in the field, Growt infers the missing record.

# Target Market: Regulated Science and Clinical Pharma

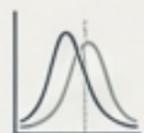

Neue Haas Grotesk

# An Uncontested Technological Moat

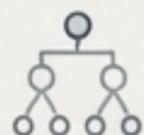

## The Operator Advantage

Every competitor is an open-source library or monolithic SaaS. Growt is the only platform built for domain expert operators.

### Global Statistics (MMD / KS)

Miss structural differences hidden within the same mean and covariance.

### Classifiers

Only give a binary yes/no accuracy score, failing to explain where or why.

### SaaS Platforms (Evidently / Arize)

Built strictly for post-deployment time-series monitoring, not pre-deployment validation.

Features	Growth Operator	Global Stats	Post-Deployment SaaS
Pre-Deployment Validation	✓	✗	✗
Cross-Instrument Comparison	✓	✗	✗
Identifies WHERE structure fails	✓	✗	✗

# The Ultimate Compliance Catalyst

- **Regulatory Mandates:** EU AI Act (Article 9), FDA guidelines, and financial audits require pre-deployment validation evidence.
- **Immutable Audit Trails:** Every audit run is timestamped, stored, and generates a structured report.
- **Audit Confirm:** Customers receive a cryptographically signed receipt and a public verification URL without needing access to your systems.
- **CI/CD Automation:** Fail builds automatically if there is no valid audit record.

## Audit Confirm

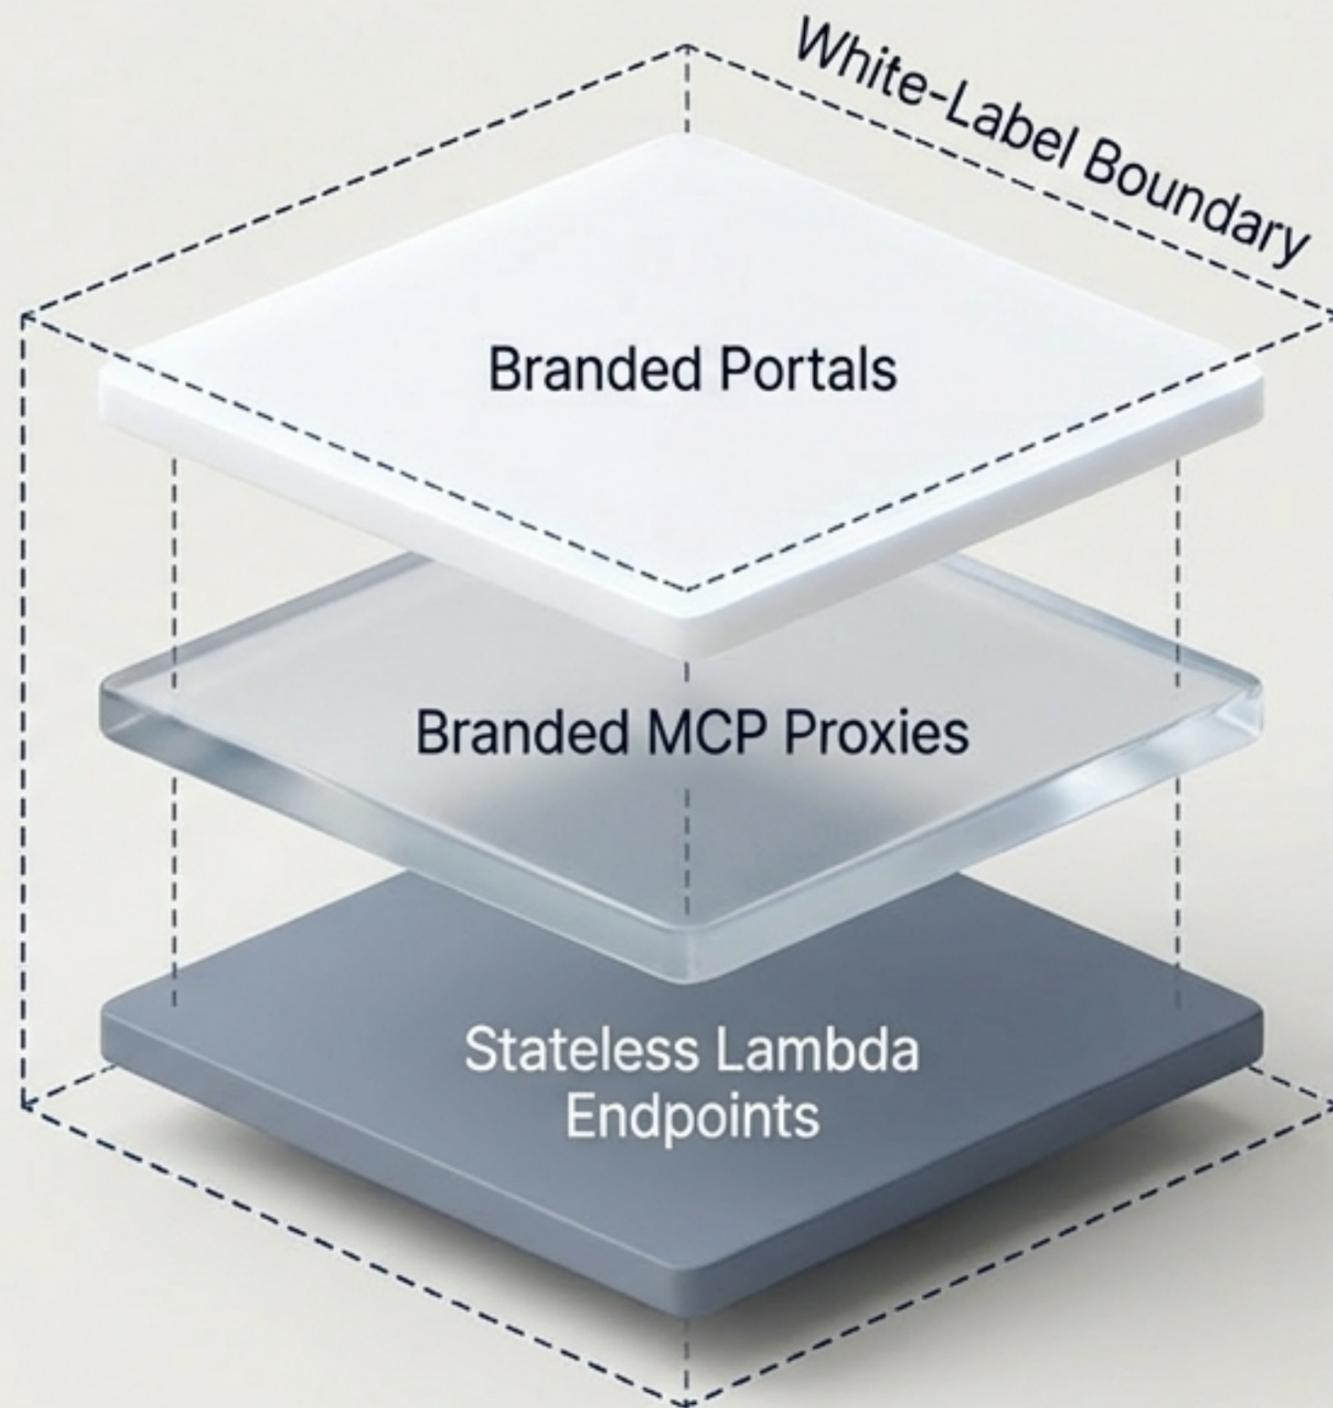

Timestamp: 14 March 2025

# The Complete Operator Product Stack

- **Stateless Lambda Endpoints**  
Highly scalable, usage-based architecture at the base.
- **Branded MCP Proxy**  
Seamless integration into your customers' AI workflows.
- **Session-Based Pipelines**  
Dedicated alignment flows for complex customer datasets.
- **Zero IP Exposure**  
Secure architecture ensures customer data and models remain entirely protected.

# Structured Monetization Tiers

Stateless endpoints only.  
Pay per call, \$0 idle.

## API

- [Feature description]
- [Feature description]
- [Feature description]

Session-based alignment,  
branded customer portal,  
usage dashboards.

## Team

- [Feature description]
- [Feature description]
- [Feature description]
- [Feature description]

Adds operator audit logs,  
GDPR data exports, EU AI  
Act registry, and  
automated PDF reports.

Most Popular

## Compliance

- [Feature description]

Dedicated infrastructure,  
Silo DB isolation, VPN  
access, and strict SLAs.

# Run Your Business Entirely Through AI Agents

- **Operator MCP**  
Connect directly to Claude, GPT-4, or Gemini.  
No complex dashboards to check.
- **Usage & Audit Health**  
Track calls per customer, trend lines, and SAFE vs RED FLAG audits.
- **Out-of-Franchise Detection**  
Automatically flags if a customer uses Growt for a domain outside your protected franchise agreement.
- **Proactive Alerts**  
Detect engagement gaps (14+ days idle) and specific use case detection.

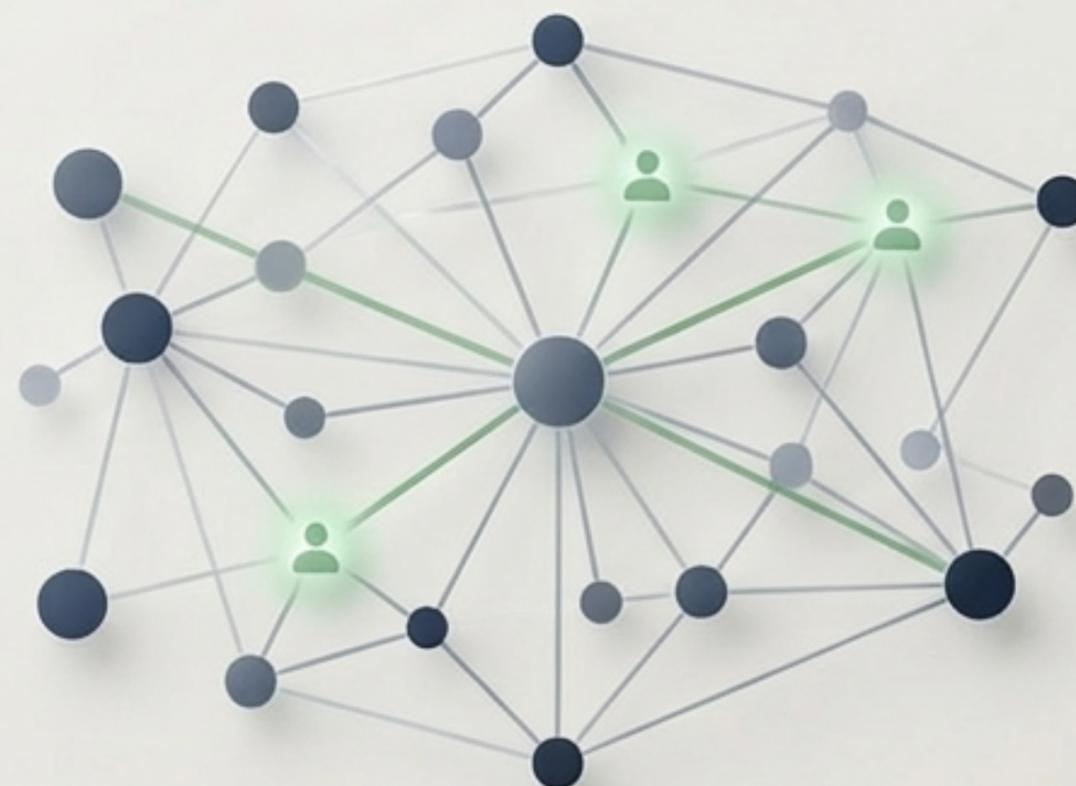

# Built-In Governance and Network Support

## Investor MCP

Give your investors a live AI audit of your franchise (MRR, churn signals, endpoint breakdowns). Scoped and rate-limited via Keygen.

## Operator Network

**Dedicated 1:1 Strategy:** Regular roadmap and strategy calls directly with the core Growth team.

**Annual Operator Summit:** Meet with global operators across different domains to shape the product roadmap.

**Referral Programme:** Earn performance bonuses tied to the revenue and outcomes of new operators you bring into the network.

# Secure Your Exclusive Territory

**1.**

## Apply

Describe your company, target domain, and desired region.

**2.**

## AI Agent Check

Talk to the Growt AI agent to verify real-time territory availability.

**3.**

## Availability Verified

Ensure no existing operator covers your territory and domain combination.

**4.**

## Invitation

Book an optional intro call or skip straight to activation.

**5.**

## Operator Agreement

Sign to permanently lock your territory. No other operator can enter.

Start your 14-day trial franchise with full Operator MCP access.  
Applications are reviewed selectively.
